

You'll be amazed at how far environmentally sustainable cleaning has come! You can be confident that your floor coverings and upholstery will be efficiently and effectively cleaned with our environmentally friendly detergents and detergent-free cleaners.

Rest assured that our products are safe for people who suffer from respiratory problems and chemical hypersensitivity. When we walk away, you'll be left with clean, fresh, perfume-free floor coverings and upholstery.

Your concern for health and the environment is our concern. We were the first company in North America to introduce effective detergent-free cleaning and the first in Canada to use low-moisture encapsulation cleaning systems — a giant step forward in green technology.

You can breathe easy knowing that CCC's environmentally sustainable cleaning services are the healthy choice for your indoor spaces and the outdoor environment.
